

Dedicated Offshore and US Servers

Get the peace of mind a dedicated PANAMA OFFSHORE server can bring you.

Offshore webhosting dedicated server applications include data storage, financial sites, and privacy applications.

- Dedicated servers in PANAMA or in the US.
- Shared hosting in the US only, for now.
- Powerful Pentium 4 Dual Core Servers with at least 2 GB of ram, latest versions of PHP 4 or 5, Mysql / phpmyadmin, GD library and more.
- No overselling for a seamless experience. All users required to follow our TOS. (Read out Terms of Service at www.panamaspace.com).
- We sell by disk space / bandwidth, not "number" of email accounts, ftp accounts, mysql databases. They are unlimited!
